

GuideTorrent

The screenshot shows the GuideTorrent website interface. At the top, there is a navigation menu with links for HOME, CERTIFICATION, ABOUT, HOW TO PAY?, GUARANTEE, and FAQ. A search bar is present with the placeholder text "input your exam code ...". Below the navigation, a main banner area contains a promotional message: "GuideTorrent offers the best excellent exam certification guide torrent and dumps torrent. We will be your best choice for exams and obtain certifications. Candidates give us a trust our guide torrent will send you a success." There are buttons for "All Products" and "Contact now".

On the right side, a circular callout highlights the "3. Complete Instant Download" step. Below this, a progress bar shows three steps: "1. Shopping Cart", "2. Payment", and "3. Complete". The "3. Complete" step is currently active.

A table below the progress bar shows a single item in the cart:

	Price	Remove
Support V1	\$26.00	

The total price is displayed as **Total: \$26.00**.

At the bottom of the screenshot, there is a form with three input fields: "Select a vendor...", "Select an exam...", and "Your email address". A green button labeled "Free Download" is positioned to the right of these fields.

WHAT PEOPLE SAY

When I feel aimlessly I order this test questions. I think it is such a good choice I make. It helps me know the exam key. Can not image I pass exam at first shot.

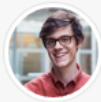

Colby

I am lucky to pass HP2-B110. High-quality dumps. Strongly recommendation!

Emmanuel

Having a calm smile to face with being disdained indicates kind of confidence. Everyone says I can not pass the C2020-001, I get it. Everything comes to him who waits. Believe in yourself

Blake

The best excellent exam certification guide torrent and dumps torrent provider

Exam : **C_HCMOD_02**

Title : Certified Application Associate
- SAP HANA Cloud Modeling

Vendor : SAP

Version : DEMO

NO.1 What can you do with shared hierarchies? Note: There are 2 correct answers to this question.

- A. Access hierarchies created in external schemas
- B. Provide reusable hierarchies for drilldown in a CUBE with star join
- C. Enable SQL SELECT statements to access hierarchies
- D. Provide reusable hierarchies for drilldown in a CUBE without star join

Answer: C,D

NO.2 Why would you set the "Ignore multiple outputs for filters" property in a calculation view?

- A. To ensure semantic correctness
- B. To hide columns that are not required
- C. To avoid duplicate rows in the output
- D. To force filters to apply at the lowest node

Answer: D

NO.3 You want to ensure that your calculation view does not give unexpected results for a query that is based on any combination of columns. What is the recommended approach for verifying the results?

- A. Write and execute a custom SQL query in the SQL Console.
- B. Select and deselect columns from the output mapping.
- C. Select Data Preview for the calculation view.
- D. Set the HIDE property for columns NOT required.

Answer: A,C

NO.4 What options do you have to handle orphan nodes in your hierarchy? Note: There are 2 correct answers to this question.

- A. Define an expression to determine a parent.
- B. Assign them to a level below the root.
- C. Assign them to a node at the root level.
- D. Generate additional root nodes.

Answer: B,D

NO.5 You have defined a pruning configuration table in a calculation view. What are you attempting to prune from the query execution?

- A. Calculated columns
- B. Joins
- C. Filters
- D. Data sources of unions

Answer: C

NO.6 Why would you use parameter mapping in a calculation view? Note: There are 2 correct answers to this question.

- A. To push down filters to the lowest level calculation views
- B. To convert the data types of input parameters

- C. To assign variables to one or more attributes
- D. To pass variable values to external value help views

Answer: A,D

NO.7 What are some of the typical tasks performed by the SAP HANA Cloud modeler role? Note: There are 2 correct answers to this question.

- A. Configure data tiering
- B. Develop SAP Fiori apps
- C. Develop calculation views
- D. Create graph workspaces

Answer: C,D

NO.8 What are some of the typical roles in an SAP HANA Cloud implementation? Note: There are 2 correct answers to this question.

- A. Modeler
- B. ABAP developer
- C. Kubernetes expert
- D. Data architect

Answer: A,D
